

Abstract

A cosmetic material sheet which comprises a sheet substrate 1 having, on an upper surface thereof, a large number of concave portions 5 arranged in a checkered pattern, a foundation layer 6 provided at a given position on the upper surface of the sheet substrate 1 in a state of covering arbitrary concave portions 5 out of a large number of concave portions 5, and a protective cover 3 attached releaseably on the upper surface of the sheet substrate 1 in a state of covering the foundation layer 6, wherein each concave portion 5 has an oblong shape in a plan view and has a bottom part thereof formed into a curved plane of a dish shape, a method for the manufacture of the cosmetic material sheet and an apparatus for use in the manufacture are provided. The cosmetic material sheet can be used for providing a sample of powdery cosmetic material having the same color, gloss and touch as those of the material actually used and has an advantage that powdery cosmetic material is strongly adhered to the sheet substrate.
